GUilty as Sprayed

PROTECT YOUR BUSINESS WITH THE UK’S MOST FEARED CRIME DETERRENT.
SmartWater’s forensic spray system is an anti-intruder device that can be used to protect points of entry and high value areas, such as cash offices and stock rooms.

Installed as a stand-alone or integrated into an existing alarm, the system can be tailored to your requirements to deter robbery or out-of-hours burglary. Multiple activation methods are available including motion sensors, panic alarms and many more.

Robust and unique, any criminals sprayed with SmartWater can be irrefutably linked back to the scene of their crimes, in effect date-stamping them to the event.

How it works:

- Sprays intruders with a uniquely identifiable traceable liquid
- Only visible under UV light – criminals cannot see it to attack it
- Fluoresces bright yellow for easy identification – many alternative systems fluoresce blue which can be mistaken with washing powders and other fluorescent materials
- Detectable on skin and clothing for weeks and irremoveable from clothing
- Leaves additional evidence at the scene, such as footprints and hand prints, to help police identify the offender
- The first traceable liquid to hold PAS 820:2012 Grade A External classification, guaranteeing the robustness of our products for 5 years.

SmartWater’s forensic spray system comes with a proven track record, with 9 out of 10* of our customers suffering no criminal attacks following its installation.

SmartWater® represents a real threat to criminals because of its track record for aiding their capture and prosecution. Hundreds of convictions have been attributed to SmartWater evidence, which maintains a 100% conviction rate in Court.

Our forensic spray systems are widely used by:

- Jewellers
- Banks / Building Societies
- Supermarkets
- Warehouses
- Cash-in-transit Couriers
- Police Forces

A mark just the size of a pinhead is enough for an offender to be linked to a crime scene.

*Based on installations carried out between November 2005 and October 2014.
Quick and easy installation

All SmartWater spray systems are installed by our in-house team of trained engineers that work to Safe Contractor and Altius standards, ensuring a high quality of work and giving you genuine peace of mind.

Installation costs start from just £1,580+VAT, and include:

- Full system installation, comprising 1 x spray system canister
- Criminally activated canisters replaced at no cost
- Canister replaced free of charge after 5 years if not activated
- High volume price breaks available on request.

All installations are subject to a site survey, which is refundable subject to a confirmed order.

Replacement canisters for accidental activations are charged at £300+VAT, fully fitted.

All installed systems are subject to an additional £295+VAT annual maintenance fee, which includes checks of the canister, nozzle, electronics readings and a walkthrough test, which ensures the system is optimised for activation should it be required.

SUPPORTING CRIMINAL CONVICTIONS

SmartWater is first and foremost a powerful deterrent, but in the event of a criminal activation we will do all we can to help the police bring those responsible to justice.

Forensic analysis of SmartWater traces found on suspects or their clothing is provided free of charge to you and the police. Our scientists will also attend court on your behalf to give evidence.

The use of our own engineers also ensures they can provide evidence in the event of a court case.

WHAT CRIMINALS SAY ABOUT SMARTWATER:

“The idea of the spray puts me off. You can get rid of clothes, but if it’s under your nails you can’t get it off.”

“If I got any on me, I would be likely to get caught.”

“I would be scared of getting SmartWater on me. I just wouldn’t want to be in the building.”

WHAT OUR CLIENTS SAY ABOUT SMARTWATER SPRAY SYSTEMS:

“SMARTWATER HAVE PROVEN THEMSELVES TO BE THOROUGHLY PROFESSIONAL INNOVATORS.”

Risk Technology Development Manager
G4S Cash Services UK
