IMPORTANT - Please read this leaflet before applying SmartWater®. Use of your SmartWater Stone Marking Security Pack is strictly subject to: www.smartwater.com/terms.
How do I apply SmartWater to external stonework?

- Make sure that areas you wish to code are clean and dry. Brush off excess dirt or debris.
- Shake the bottle for at least 30 seconds before use and every 15 minutes during use. If your pack includes a spray bottle, please shake for 30 seconds before decanting.
- Apply SmartWater by brush or by proprietary sprayer (e.g. a trigger spray bottle). Do not use the same applicator for more than one batch of SmartWater as this will result in cross contamination.
- Only use in areas which are well ventilated.
- Do not apply to surfaces if rain is expected within 4 hours of application.
- Check your SmartWater has not expired by referring to the use by date on the bottle.

The UK’s most powerful deterrent

The presence of SmartWater is a highly effective deterrent to criminals. Remember to display your THIEVES BEWARE® deterrent labels and signs where they are clearly visible.
Where should I apply SmartWater?

- SmartWater can be used to mark flagstones, bricks, dry stone walls, paving and other porous surfaces. The solution can also be applied to garden ornaments.
- Apply to rough and uneven surfaces, inconspicuous nooks and crannies, and surfaces that are unlikely to be walked on or routinely subject to wear.
- On paving stones apply SmartWater to stone edges and along mortar joints.
- SmartWater can leave a slight sheen when dry. You may wish to test SmartWater on an inconspicuous area or another similar surface beforehand.
- Any samples taken for recovery of evidence may cause scuffing and blemishes. Therefore avoid coding surfaces which are on view where possible.
- Check the level of fluorescence periodically with an ultraviolet light and apply more SmartWater as and when required. Ultraviolet lights can be purchased from our website www.smartwater.com/shop

A few don’ts:
- Don’t dilute your SmartWater solution.
- Don’t apply it to working, moving or functional parts.
- Don’t store or use it in extreme hot or cold temperatures.
- Don’t try to write with the solution.

After use:
- Clean the applicator in clean, warm water.
- Wipe the thread of the bottle with a clean, damp cloth or paper towel.

Remember to display your THIEVES BEWARE® deterrent signage.
Please contact us if you change your address so we can update your details on our database.

Health & Safety

General
- Keep out of reach of children.
- Clean up spillages immediately.
- Although non-hazardous, gloves and eye protection are recommended when using SmartWater.

First Aid
- Contact with eyes: rinse with plenty of water for at least 15 minutes.
- Contact with skin: immediately wash the area with soap and water.
- Swallowing SmartWater: wash out your mouth with water and consult your doctor if any symptoms develop.
